

UNIVERSAL AIR TRAVEL PLAN (UATP)

Direct. Detailed. Effective. Savvy business travelers, corporate travel managers and travel agents worldwide are benefiting from the Universal Air Travel Plan (UATP). Coined for years as the Ultimate Corporate Payment SystemSM, UATP is more than just a card or travel plan, it's a complete travel management solution. Move ahead with UATP and see the detailed difference for yourself.

With global acceptance by nearly every airline worldwide, UATP is the most direct and efficient way to purchase corporate air travel. By building a direct payment relationship through UATP with their airline of choice, business travelers today can reduce costs and build stronger relationships while developing more efficient and strategic travel programs. Using the most detailed data available in the industry will ensure any travel manager success in managing and budgeting for travel. Nearly three-fourths of corporations in the Top 100 Global have already recognized UATP as the most effective payment solution of choice, shouldn't your business?

DIRECT

When flying, the direct route is most often a traveler's preference. Shouldn't your payment system be as efficient? With UATP, a direct billing relationship is formed between the airline and the corporate travel manager allowing for a more effective deal. Once issued, the UATP card is not limited to purchases on one particular airline but instead is an accepted form of payment by airlines worldwide. A corporation's global air travel information is billed in one monthly statement, compiled with flexible billing options to control costs and reduce reconciliation processes. UATP is an airline-owned product that

doesn't permit third party access to your data or include any third-party membership charges. Travel agents benefit from UATP by no longer carrying the liability and float costs for the airline ticket purchased, which in turn provides an increase in cash flow.

DETAILED

With UATP not only will you have the most complete travel data on your preferred airline, but on practically every carrier your business travelers fly. UATP is the preferred and accepted form of payment by virtually every airline in the world. In 1999, over 95% of available seat miles worldwide could have been purchased with a UATP account.

With UATP, corporations receive superior global management information reports that include extensive detail for all air travel expenses. Consistent, highly detailed and accurate data affords

corporations the most beneficial loyalty agreement with an airline. A variety of management information reports are available to assist corporations in analyzing their travel spend patterns. These reports allow companies to develop and maintain effective travel management policies. Customized billing is available in a flexible format that will readily interface with a company's internal accounting system. With UATP, the most comprehensive air travel management information is available and no other card provides such consistent and thorough information on a worldwide basis.

EFFECTIVE

Developed in 1936, UATP is the world's first charge card. Formerly marketed as Air Travel Card[®], PassAgeSM and AirPlusSM, UATP has consolidated and re-branded under one worldwide name, Universal Air Travel Plan. Designed specifically to meet corporate travel needs, UATP is still the world's premier corporate charge program. More than 24 airlines around the world are contracted issuers of the program, maximizing their preferred corporate clients' control over global business expenses. Without currency exchange fees, annual fees, connection fees or interest fees, UATP provides all the best customer benefits free of charge.

CARDHOLDER SERVICES & BENEFITS

There is no easier or more efficient way to manage your company's travel expenses, than with UATP. By allowing corporations the autonomy to design their own payment and data management programs, tailored UATP programs fit seamlessly into the preferred account management systems. By eliminating the need for cash advancements and reimbursements, corporations can improve their cash flow and exercise greater cost control. UATP is also an improvement to credit security, by allowing corporate travelers to charge air travel only expenses.

In addition to the wide array of corporate benefits, UATP offers numerous advantages to cardholders. Employees may carry just one card for all air expenses — or no card at all! Whether issued a walking card or a lodged "ghost" account, travelers are relieved of the burden of waiting for reimbursement of air charges (usually the largest travel expense) because of UATP's centrally-billed payment system.

Also, business travelers receive automatic insurance coverage when purchasing travel on a UATP account. Executive ConnectionSM insurance coverage is designed specifically to cover business travelers' needs. Provided with every ticket purchased on a UATP account* the following benefits apply: \$200,000 Travel Accident Insurance, up to \$50,000 evacuation and repatriation coverage as well as up to \$150 coverage for delayed luggage. This automatic coverage also includes 24-hour worldwide emergency medical, dental and legal consultation services through

*The specific coverage described above applies when a travel ticket is purchased using a UATP card issued by a US based carrier. Insurance coverage may differ with a UATP card issued from non-US carriers.

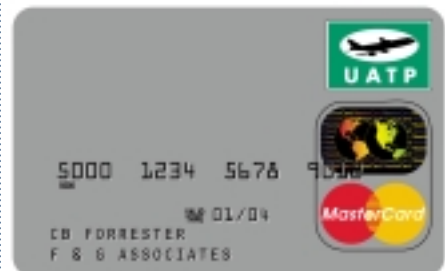

PassengerAid[®]. Optional upgraded levels of insurance are also available for purchase at a small incremental cost. For more detailed information, please visit uatp.com/corp or call +1 (202) 626-4225 or +1-800-854-9600 (US only), fax +1 (202) 626-4243 or email insurance@uatp.com.

MOVING AHEAD

Originally created as an air-only product, UATP has established options for corporations desiring a full travel and entertainment (T&E) solution. With a co-branded UATP card, the airfare portion of a corporation's travel costs remains centrally billed to the airline, while the remaining expenses are handled by MasterCard[®] or VISA[®]. The corporation then has the choice between one centrally billed statement or individually issued statements to the corporate travelers.

UATP is the easiest and most efficient way to manage your company's travel expenses. Whether your company chooses the air-only UATP as a lodged or walking card or the MasterCard[®] or VISA[®] co-branded option, you will receive a payment system with over 60 years of business travel experience that provides unmatched benefits to your employees and your corporation's bottom line.

UATP headquarters in Washington, DC provide the base for global operation. With satellite offices in Geneva, Singapore and Sydney, UATP continues to foster international travel growth. For further information, please visit UATP.com, email info@uatp.com, or call +1-800-222-4688 (US only) or +1 (202) 626-4225 (International) or any of the US card issuing airlines directly.
